NO. 16

MATHEWS BROS. Producers of QUALITY PAINTS MATHEWS BROS.

Raw Materials

Are purchased in car load quantities and thus we are enabled to obtain the lowest possible prices.

Shalon Paint Agencies

Norfolk Hardware Co., No. 42 Washington St.
Ferratt Hardware Co., 554 Church St.;
Port Norfolk Supply Co., Port Norfolk, Va.
Hutson & Hudgins, New Point, Va.
Geo. W. Milby, Rescue, Va.
John E. Wornom, Dare, Va.
Hudson Mench, Menchville, Va.

Our Factory

Formulas and process are open, at all times, for the inspection of our trade.

Any customer can have for the asking an analysis of any product bearing the firm name.

Distributors

Pratt & Lambert's Varnishes, Japans, Stains, Enamels, Fillers, etc., etc.

Strictly Pure Linseed Oil.

Strictly Pure Turpentine.

Whiting's Brushes.

UNLOADED IN OUR FACTORY

CAR LOAD OF DRY WHITE LEAD

WEDNESDAY, MAY 8th, 1912

Shalon Paint

Registered in U. S. Patent Office. This material embodies the five essentials in good paint.
1st. DURABILITY. It contains Carbonate of Lead, Oxide of Zinc and Hydrated Calcium of Sulphate in the exact proportion that has been found by actual test to wear longest in a salt air climate.
2nd. DENSITY. Each shade is made with the idea clearly in mind of having it cover the surface to which it is applied.
3rd. WORKING QUALITIES. The vehicle is strictly pure Linseed Oil. The paint, therefore, works very freely under the brush and does not pull as is the case with Paints containing Varnish.
4th. PERMANENCY OF COLOR. The coloring matter used to produce the different tints is of the highest quality and will not fade.
5th. SPREADING QUALITIES. It is ground exceedingly fine by the latest and most improved machinery and one gallon will cover about 500 square feet of surface.

It will require one gallon of pure Linseed Oil to thin each gallon of Paint, thus reducing the cost to a minimum.
Shalon is made in 30 attractive colors and White, and put up in one gallon, half-gallon and quart cans.

"It gains by comparison."
For prices and Color Cards, apply to us direct or to our nearest agency.

Factory and Main Office
W. Southampton Ave., Atlantic City Ward

Linseed Oil

We cannot do better than repeat here what we have said before as to the necessity of using pure Linseed Oil.

And here it is:
No Paint will give the best results unless it is thinned with pure Oil.

If impure Oil is used unsatisfactory results will follow.

It is, therefore, for your protection as well as for the protection of our products that the quality of the Linseed Oil be fully known.

There are some Oils on the market which are such good imitations as to make it practically impossible to tell what they are without chemical analysis, and yet some of these imitations are about as worthless in Paint as Benzine.

In order to afford protection on this point we have made the necessary arrangement and will have analyzed, free of cost, a sample of any Oil sent to us by our regular trade.

The question of Linseed Oil in Paint is too important to be neglected.

See to it that you avoid bad Oil.

English White Lead

Carbonate of Lead 54 per cent.
Oxide of Zinc 31 per cent.
Hydrated Calcium Sulphate 15 per cent.

We do not claim this product to be as good as straight White Lead, but we claim it to be far superior; and this claim is in thorough accord with modern investigation and is upheld by the opinion of the most eminent Paint Chemists and Master Painters in America.

There is a reason for the use of each ingredient and also for the percentage used in the combination.

The Carbonate of Lead is to give density or hiding power.
The Oxide of Zinc is to harden the paint and make it very white.

The Hydrated Calcium Sulphate serves as a binder and at the same time neutralizes the acids; it is an alloy and necessary to durability.

Carbonate of Lead, Oxide of Zinc and Hydrated Calcium of Sulphate when used alone are recognized to be defective pigments, but when the three are used in combination, in the proper proportion, and this combination is thinned with pure Linseed Oil, you will have the most durable paint that can be made.

ENGLISH WHITE LEAD
Makes a white mark on ordinary white lead. It has splendid covering or hiding qualities. It works freely under the brush.
It takes 6 gallons pure Linseed Oil to each 100 pounds.
For prices apply to us direct or to our nearest agency.

M. B. Flat Paint

(For Interior Use)

This material dries with a soft velvety finish and can be washed with soap and water whenever it is soiled without in any way affecting its beauty.

It will not check or peel; nor will it turn yellow with age.

It is very durable and may be used with fine effect on plaster walls, metal ceiling, wood work, canvas, burlap, cement surfaces.

It is unexcelled as an undercoating for Enamel.

M. B. Flat Paint is made in White and 16 beautiful tints.

Send for Color Cards and descriptive literature.

Elastic Mixed Paint

This material is composed of Oxide of Iron, Pure Linseed Oil, No. 1 Japan Dryer. It is a high quality product and recommended for

Metal Surfaces
Tin Roofs
Barns
Bridges

DR. GEO. B. HECKEL, Chemist of the Paint Manufacturers' Association of North America, says: "Oxide Paints are wonderfully durable. It seems almost impossible for them to wear out. Year after year the color defies the elements and the coating remains in place without apparent deterioration."
MR. E. CAMERON, who has charge of the testing departments of the Belgian Railroads, in an address before the International Association for testing materials summed up his conclusions as follows: "In my opinion, the best paint to protect iron and tin from rust should consist of Iron Oxide prepared with pure Linseed Oil under exclusion of Essence of Turpentine."

TERRY SAYS: "The whole group of Oxide Reds is of foremost importance, by reason of their good color, covering power and durability, besides which their cost is reasonable."
Elastic Mixed Paint is made in eleven different colors and put up in barrels, half-barrels, five gallon kits, one gallon, half-gallon and one-quarter gallon cans.
For prices or Color Cards, apply to us direct or to our nearest agency.

MATHEWS BROS., Paint Makers
